## • PROFILE

- Motivated and self-taught Front-End Developer with hands-on experience creating dynamic, user-friendly websites and applications. Proficient in modern technologies such as HTML5, CSS3, JavaScript, React, and Python, with a passion for building seamless digital experiences.
- Successfully completed multiple freelance and self-driven projects, showcasing a commitment to innovation, responsiveness, and functionality. Dedicated to continuous learning and keeping up with emerging web technologies.

## WORK EXPERIENCE

- Freelance Front-End Developer
- Key Achievements:
- Developed user-friendly, responsive platforms such as Bright Mind Academy (LMS), Infinite Learning (LMS), and an E-Book Platform, showcasing innovation and versatility.
- Created interactive interfaces and applications like Google Gemini Clone and a Movies Platform, focusing on delivering intuitive user experiences.
- Engineered advanced features, including AI-powered tools, e-commerce functionality, and seamless course management systems.
- Delivered high-quality projects tailored to client requirements, exceeding industry standards.
- Continuously enhanced skills in modern web frameworks and best practices.

## PROJECTS

### 1) Infinite Learning (LMS)

- Built a comprehensive Learning Management System to enhance online education with interactive, user-friendly tools.
- Key features include seamless course creation, content organization, student progress tracking, and an engaging online learning environment.
- Technologies Used: React, CSS3, Firebase

### 2) Google Gemini Clone

- Designed an innovative AI-powered application inspired by Google Gemini, streamlining task management and enhancing productivity.
- Key features include daily activity tracking, real-time assistance, and advanced AI-driven functionalities.
- Technologies Used: JavaScript, Python, React
